16/1183 dt. 29-05-2015 andNo. 14-55/AHVS/16-17/1041 dated
01-06-2016.PASHUPALAN SCHEME (AMENDED)
MODIFIEDBREEDING AND REARING OF COWS/
BUFFALOES/CALVES SCHEME*Introduction:*— The Livestock Economy
penetrates sections of rural society bothvertically and laterally, supposedly more
equitably than land holdings.Considerably there have been dramatic
favourable changes in livestock population
and composition over the past five decades,
but overall impact on poor has not been much.Goa has its own Breeding Policy and
accordingly animals are to be bred using
Jersey semen. However, the local cattle
owners find it very difficult to stall-feed their
unproductive indigenous cattle. This leads to
the animals roaming in the streets looking for
grazing patches or feeding from the dustbins
as scavenger cows. Deaths in these cows are
reported due to consumption of plastic bags
over a period of time, which is total loss to
the farmer and the State. Unlike stray dogs,
the stray cattle have owners, who due to their
own financial circumstances cannot stall feed

the unproductive animals, as it is a further burden to their pocket. The promotion of dairy husbandry through crossbreeding of low productive local cattle is therefore to be given priority as most of the villagers own a few cattle. This programme will ensure techno-economic viability and prosperity to the small farmers. Local cattle breeding, was initiated by the Government of Goa in early 70's, but was not popular, due to the high feeding cost during stall feeding.

Considering this scenario, further research and technology transfer are needed in areas of genetic improvement, reproductive efficiency and nutrition and health care, all these areas are equally important to improve the overall quantity and quality of milk production. Genetic improvement in this direction can further promote economic and eco-friendly dairy husbandry, which the small farmers are looking forward for their sustainable livelihood. There should be no limitation to the number of animals covered by individual farmer or organization. The Indigenous breed need to be conserved by breeding with semen of same breed and calves born to be reared scientifically. It is found that the entire cost of rearing of one calf from birth to 27 months is high as Rs. 52,800/- (Rupees fifty two thousand eight hundred only) and general category beneficiaries are getting 75% of the estimated cost of rearing a calf. The General Category beneficiaries from Dudh Gram areas will get an enhanced subsidy of 90% of the estimated cost of rearing of calf.

Objectives:— The main objectives of the scheme are as follows:—

- √ To encourage the cross breeding of cows and buffaloes.
- √ To encourage rearing of cross-bred calves & improved buffalo calves/ Indigenous Breed calves namely Sahiwal, Gir & Red Sindhi from birth to 27 months.
- √ To encourage and uplift the S.C. and S.T. & Dhangar community.
- √ To improve & sustain the productivity of cattle & buffalo through use of Artificial Insemination practices.
- √ To assist the farmer financially in stall feeding the local animals & rearing of the cross-bred calves & improved buffalo calves/Indigenous Breed calves namely Sahiwal, Gir & Red Sindhi.
- √ To indirectly reduce the menace of stray cattle.
- √ To encourage NGO's/Goshalas/Community Farms and other organizations to take up calf rearing in scientific manner.
- √ To conserve the Indigenous breed.

Eligibility:

- All farmers availing the Artificial Insemination facility for cattle and buffalo and registered with the local Government Veterinary Services.
- NGO's/Goshalas/Community Farms and other organizations and other organizations availing the A.I. to cows & buffaloes.
- All farmers irrespective of their financial status.
- All the farmers having cross-bred female calves/improved buffalo female calves born out of AI or calves born to cows purchased under any scheme of the department. All Indigenous breed calves namely Sahiwal, Gir & Red Sindhi born out of AI or Natural service (by the same breed bull). In case of natural service, the same should be reported to the local Area Officer in writing.
- 5 years residence certificate is essential.
- Agreement Bond as prescribed, duly signed and completed in all respects should be submitted along with the application form.
- Duly filled in Consent form for seeding of Aadhaar details.

Expectation on implementation of the scheme:

- ❖ This programme will eliminate stray cattle and conserve community or individual paddy field, crops, plantations and forests from being destroyed by grazing of stray cattle.
- ❖ Door to door, service will help them to avail timely services and to develop confidence in adoption of the technology.
- ❖ Promotion of healthy crossbred cattle/improved buffaloes/indigenous breeds of cattle namely Sahiwal, Gir & Red Sindhi.
- ❖ Unproductive local cattle population will be reduced.
- ❖ Non-dependence on neighbouring States by beneficiaries for their requirement of crossbred animals under various Government Schemes.
- ❖ Increase in the number of crossbred cows/improved buffaloes/indigenous breed calves namely Sahiwal, Gir & Red Sindhi, thereby giving a fillip to the yield of milk in Goa.

Procedure:— The scheme consists three phases. The first phase deals with the Artificial Insemination of non descript cows and buffaloes. The second phase is the confirmation of pregnancy of inseminated animals and feeding incentive.

The third phase deals with rearing of the female calves from birth to 27 months. All the cross breed calves, improved buffalo calves and pure bred calves of indigenous breed namely Sahiwal, Gir and Red Sindhi shall be included in the scheme.

A. PHASE - 1

5. The cow/buffalo has to be kept tied on the day of A.I. and two days subsequent to the heat, so as to avoid natural service by local bull.
6. The Beneficiary is entitled to this benefit only for one A.I. per cycle.
7. No additional incentives will be given for repeat of A.I. for the same oestrous cycle.
